## Plastic (PET) growlers, a great new alternative to glass!

PET Growlers are strong, light weight, and recyclable! For craft beverage producers like you, this makes them a great alternative to glass. With PET Growlers you can distribute and sell your products to customers for use in areas where glass may not be acceptable or preferred... parks, beaches, festivals, etc. You also eliminate any breakage which can occur when filling, storing, and distributing glass growlers.

**Technigraph offers a complete set of PET Growlers for all your brewing needs – 20, 25, 32, and 64 oz. fill sizes – including the supporting caps.** Our PET

Growlers are fully customizable with your printed logo and supporting promotional information. We offer reasonable quantities to minimize your on-hand inventory and storage space. PET Growlers are a great compliment to any craft beverage producer's customer sales model.

## Sustainability / Recyclability

PET Growlers are fully recyclable and substantially lighter than glass, and are allowed in many places that glass is not. PET Growlers can be washed with soap and re-used, or – for occasions when it's not convenient to bring the container back with you – **the plastic Growler is so inexpensive, it can justifiably be disposed of and recycled.**
